Nourivan™ Antiox	White to light yellow cream	- Antioxidant O/W cream base - Nourishing formulation with excellent moisturizing properties	• NORMAL • SENSITIVE/AFFECTED	Compounding APIs and DCIs prone to oxidation	• Face • Body • Hands/Feet • Scalp	2.5 to 5.5	HIGH	• Hydroquinone • Resorcinol
Occluvan™	Shiny, white to off-white ointment	- Hydrophilic ointment base - High occlusive, emollient and humectant properties	• DRY • SENSITIVE/AFFECTED	Compounding hydrophilic and lipophilic APIs and DCIs for very dry or affected skin types. Ideal for body extremities, post-procedures creams, sun-burned skin.	• Face • Body • Hands/Feet • Scalp	Not applicable	HIGH	• Zinc Oxide • Zinc Sulfate

	Appearance	Description	Skin Types	Indications	Application Areas	pH	Vanishing	Example APIs/DCIs
Seraqua™	White to translucent, pourable serum	• Ultra-light O/W serum base • Rich in silicones with high hydrating properties and great spreadability	• NORMAL • DRY • OILY • COMBINATION	Compounding face serums for multi-functional treatments (e.g., anti-aging, moisturizers, vitamin boosts, etc.)	• Face • Body • Hands/Feet • Scalp	3.5 to 5.5	HIGH	• Alpha-bisabolol • D-Panthenol • Tretinoin
Versatile™	Shiny, white to off-white cream	• Vanishing O/W cream base • Excellent hydrating properties with soft texture	• NORMAL • DRY	Compounding APIs and DCIs for normal/balanced or dry skin types	• Face • Body • Hands/Feet • Scalp	3.5 to 5.5	HIGH	• Betamethasone • Caffeine • Clobetasol • Ketoconazole • Salicylic acid
Versatile™ Anhydrous	White opaque ointment-like cream	• Slightly occlusive film-forming base, readily absorbed after application • Unique solvent system that allow for lipophilic and hydrophilic APIs • Built-in antioxidants system • Extended beyond-use date	• DRY • SENSITIVE/AFFECTED	Compounding APIs sensitive to water activity or to oxidation for (very) dehydrated or affected skin	• Face • Body • Hands/Feet • Scalp	Not applicable	REGULAR	• Hydroquinone • Tretinoin
Versatile™ Rich	Shiny, white to off-white cream	• Enriched O/W hydrophilic cream base, with natural lipids • Excellent protective and hydrating effects, with minimal greasiness	• DRY • SENSITIVE/AFFECTED	Compounding hydrophilic APIs and DCIs for (very) dehydrated or affected skin	• Face • Body • Hands/Feet • Scalp	3.5 to 5.5	HIGH	• Amonium Lactate • Azelaic Acid • Bethametasone • Dipropionate • Clindamycin • Urea
Espumil™	Clear solution	• Lipophilic foam base • Creamy foam formulation with light skin feel and drip-free	• NORMAL • OILY • COMBINATION • SENSITIVE/AFFECTED	Compounding foams for applying APIs and DCIs in hairy areas	• Face • Body • Hands/Feet • Scalp	1.5 to 3.5	HIGH	• 17-α-Estradiol • Caffeine • Clobetasol • Propionate • Minoxidil • Latanoprost

	Appearance	Description	Skin Types	Indications	Application Areas	pH	Vanishing	Example APIs/DCIs
Cleoderm™	White to off-white cream	• Functional vehicle with ingredients such as Cleome gynandra, palmitoyl tripeptide 8, bisabolol, hyaluronic acid, and functional oils • High anti-inflammatory, antioxidant and anti-bacterial activity	• OILY • COMBINATION • SENSITIVE/AFFECTED	Compounding APIs recommended for dermatological treatments for sensitive and affected skin (e.g., acne, rosacea, dermatitis, hyperpigmentation)	• Face • Body • Hands/Feet • Scalp	4.5 to 6.5	HIGH	• Adapalene • Dapsone • Hydroquinone • Tretinoin

API = Active pharmaceutical ingredient
DCI = dermatological ingredient

W/O = water-in-oil
O/W = oil-in-water

Together
we create the future
of personalizing medicine.
