

15. September (Dienstag)

11:00–11:30 **Qualität von Primärpackmitteln**

Das Packmittel ist Teil der Rezeptur: Wie die richtige Auswahl und Prüfung von Primärpackmitteln Stabilität, Haltbarkeit und Sicherheit Ihrer Zubereitungen entscheidend beeinflussen.

Birgit Hildago Gil, PTA

12:00–12:30 **Cannabis neu denken – Rezeptur neu gestalten**

Becanex & Fagron PLEX Rohextrakte: Wie individuelle Cannabis-Rezepturen zum echten Umsatztreiber Ihrer Apotheke werden – von der Qualität des Rohextrakts bis zur fertigen Zubereitung.

Carina Bopf, Head of Sales, Becanex GmbH

13:00–13:30 **Innovationen, die den Rezeptur-Alltag erleichtern**

Neue Hilfsmittel, Grundlagen und Konzepte, die Ihre Rezeptur schneller, sicherer und wirtschaftlicher machen – kompakt und direkt umsetzbar.

Dr. Stefan Bär, PharmD

14:00–15:00 **Beyond the CoA: supplier qualification and quality in compounding**

A Certificate of Analysis is only the beginning. How rigorous supplier qualification, traceability and quality governance protect your patients — and your pharmacy — in everyday compounding.

Savvas Koulouridas, LLB, MA, MSc

15:00–15:30 **Im Herzen einer großen Rezeptur-Apotheke**

Ein Blick hinter die Kulissen der Bahnhof-Apotheke Kempten: Wie Organisation, Qualität und Leidenschaft eine der bekanntesten Rezeptur-Apotheken Deutschlands prägen.

Jennifer Fischer, Apothekerin, Bahnhof-Apotheke Kempten

16:00–16:30 **Optimierte Herstellung von HRT-Rezepturen**

Humanidentische Hormonrezepturen sicher, reproduzierbar und effizient herstellen – bewährte Rezepturkonzepte und praktische Kniffe für den Rezeptur-Alltag.

Dr. Stefan Bär, PharmD

16:30–17:15 **ROUND TABLE · Peptides in compounding: safety and the regulatory frontier**

Pharmacist, physician and regulator take on one of compounding's hottest — and most scrutinised — frontiers: where do peptides really fit, and how do we handle them safely and legally?

► **The pharmacist's view**

Feasibility, quality, stability and sterility — what safe peptide compounding truly demands at the bench.

Dr. Hudson Polonini, PharmD

► **The physician's view**

Indications, clinical evidence and patient safety — where peptides genuinely help, and where caution is essential.

Dr. Carolina Silva, MD, Pediatrician

► **The regulator's view**

Classification, legal status and compliance — navigating a fast-moving and tightening regulatory landscape.

Savvas Koulouridas, LLB, MA, MSc

16. September (Mittwoch)

11:00–12:00 Safe medicines for the smallest patients

11:00–11:40 ▶ Safe by design: excipient safety in neonates & infants

Ethanol, propylene glycol, benzyl alcohol, benzoates, parabens and heavy sugar loads have no place in a neonate's medicine — why they matter at this age and why many commercial products fall short.

Dr. Carolina Silva, MD, Pediatrician

11:40–12:00 ▶ From tablet to spoonful: optimising oral suspensions

Turning capsules and tablets into stable, accurately dosed suspensions — vehicle choice, technique and the quality checks that make the difference at the bench.

Dr. Hudson Polonini, PharmD

12:00–13:00 Tiny tablets, big advantages: minitables for children

12:00–12:30 ▶ Why minitables work for children

The evidence that infants and toddlers accept minitables; precise count-based dosing (1, 2, 3 units), fewer excipients, no sugar burden, and better stability, portability and adherence than liquids.

Dr. Carolina Silva, MD, Pediatrician

12:30–13:00 ▶ Hands-on: compounding minitables with DiluTab

Roll up your sleeves — a live, step-by-step demonstration of producing dose-flexible minitables in the pharmacy, from blend to press to finished dose.

Dr. Anderson Ferreira, PharmD

14:00–15:00 The patient who can't swallow: paediatric dysphagia

14:00–14:30 ▶ When swallowing fails: the clinical picture

Dysphagia in children and beyond — why standard solid dosage forms fail these patients and where tailored compounded forms change outcomes.

Dr. Carolina Silva, MD, Pediatrician

14:30–15:00 ▶ Hands-on: orodispersible films (OrPhyllo)

See orodispersible films made at the bench — a fast-dissolving, swallow-free dosage form demonstrated step by step, from casting to finished dose.

Bruna Marianni, PharmD

17. September (Donnerstag)

11:00–11:50 Modern women's health: menopause & vulvovaginal care

11:00–11:30 ▶ The clinical picture: menopause & vulvovaginal care

Individualised bioidentical hormone therapy, vulvovaginal atrophy and recurrent vaginitis — a gynaecologist's view on what patients really need.

Dr. Melina Stasinou, MD, Gynecologist

11:30–11:50 ▶ The right dose, the right form: transdermal HRT & vaginal films

Translating the clinical need to the bench: precision transdermal HRT (Pentraven) and mucoadhesive vaginal films (FemPhyllo) as modern, patient-friendly dosage forms.

Dr. Hudson Polonini, PharmD

12:00–13:00 Pharmaceutical films: a cutting-edge dosage form

12:00–12:30 ▶ The thin frontier: why films matter

Why films are among the most exciting dosage forms in modern compounding — the science of polymers, mucoadhesion and drug loading, and where they outperform conventional forms.

Dr. Anderson Ferreira, PharmD

12:30–13:00 ▶ Hands-on: vaginal mucoadhesive films (FemPhyllo)

A practical, cutting-edge demonstration of preparing vaginal mucoadhesive films from start to finish — a genuinely novel dosage form, made live before your eyes.

Bruna Marianni, PharmD

13:00–13:30 Rezeptur ohne Risiko – Nachwuchs verantwortungsvoll und rechtssicher fördern

Wie Apotheken ihren Nachwuchs an die Rezeptur heranführen: sicher, rechtskonform und mit Freude am Handwerk. Der PTA des Jahres 2023 zeigt, wie Qualität und Verantwortung Hand in Hand gehen.

Wolf-Hendrik Ittner, PTA des Jahres 2023

14:00–14:45 Better transdermals: compounding with precision and confidence

Getting actives through the skin reliably. Formulation strategy, vehicle selection and quality control for transdermal preparations that deliver reproducible, clinically meaningful outcomes.

Dr. Hudson Polonini, PharmD

15:00–15:30 Optimierung von transdermalen HRT-Rezepturen (auf der pharma-world Bühne)

Humanidentische Hormonrezepturen sicher, reproduzierbar und effizient herstellen – bewährte Rezepturkonzepte und praktische Kniffe für den Rezeptur-Alltag.

Dr. Stefan Bär, PharmD
